# All your system

VIA puts all you need

## Navigation buttons

Switch between battery, tank, temperature screens;  
adjust values; scroll in settings

**No tech skills needed.** Just intuiti

# S - ONE PANEL

to know in one place

## Enter button

Short press: confirm/change scale

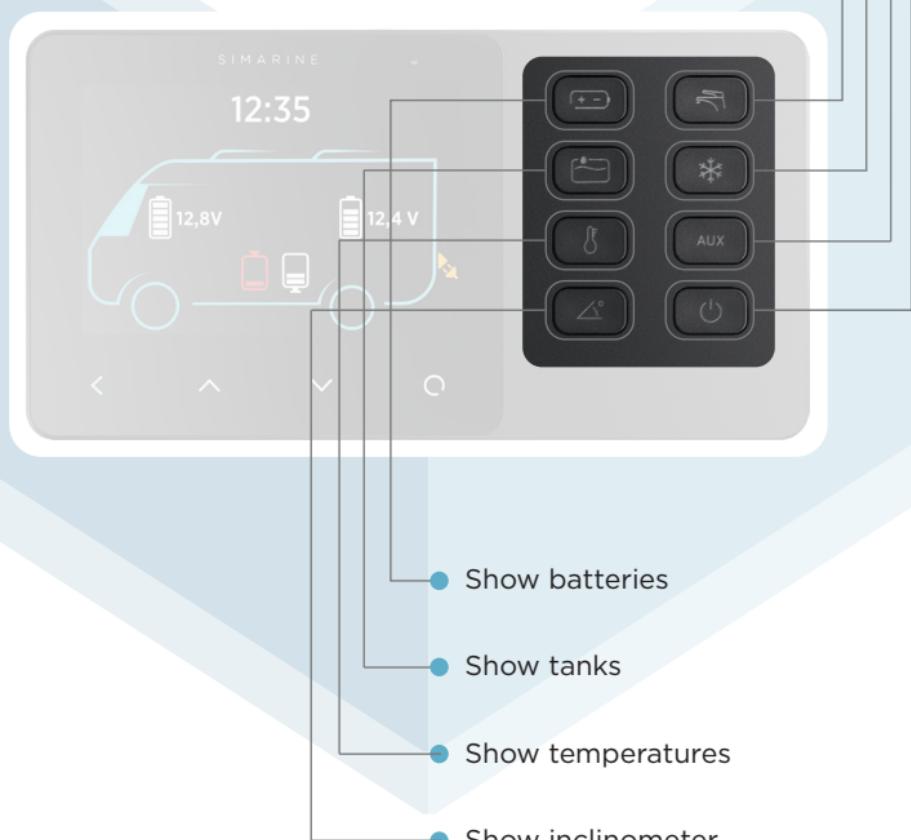

Long press: open settings

## Device buttons

Press the buttons on the right to turn the fridge and lights on or off, or to jump to the detailed battery screen. The indicator light shows what is on or off.

ive control - the way it should be.

# Push the right button

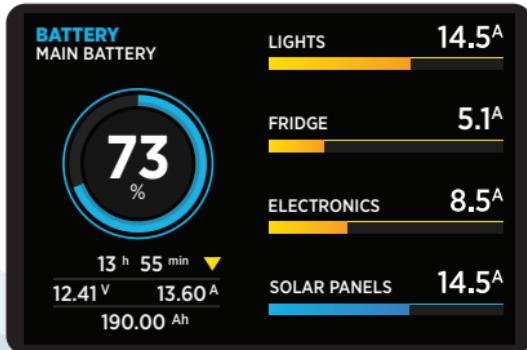

## Vital information at a glance

Your VIA home screen shows your battery and tanks information in a compact and informative way.

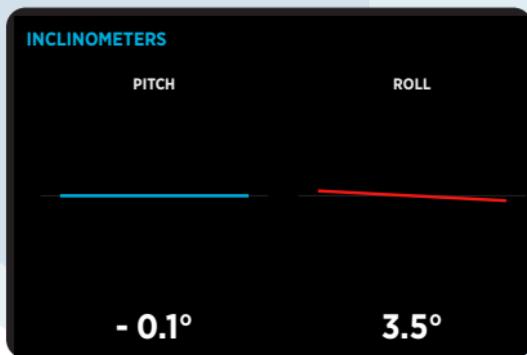

## Check battery state of charge and voltage (service & engine battery)

Displays your battery information in detail

## Monitor all your devices individually (with an expansion module)

See how much current your fridge is consuming comparing to incoming current from solar.

## Pitch & Roll monitoring (with SD01 inclinometer module)

Innovative inclinometer helps you monitor your vehicle's pitch and roll and helps you evenly distribute weight loads on your vehicle.

## See fresh & wastewater levels

Always be sure of how much water you have left to cook, shower, or make your favourite drinks.

**Be alarmed when the battery state, water level, or temperature is too low or too high.**  
Configure alarms for any monitored device (battery state, temperature levels, tank levels). A visible and audible alarm will notify you whenever the set conditions are met.

## Control devices and monitor data on your phone

Download our free Simarine Mobile App and connect to VIA over WiFi to monitor live data. Relax outside while controlling your lights or checking battery and tank status. Adjust settings or upgrade the firmware with ease.
